Summary

- **About me**: Ph.D. candidate in Electrical and Computer Engineering at Purdue University, advised by Professor **Murat Kocaoglu**. My research focuses on causal discovery and its applications to invariant prediction and root cause analysis. Recognized for outstanding reviewing service at NeurIPS, ICML, ICLR, AISTATS, and UAI.

Education

- **Purdue University** — West Lafayette, IN
  Doctor of Philosophy in Electrical and Computer Engineering — *Aug. 2021 - May 2027(expected)*
  - **Relevant Coursework**: causal inference, reinforcement learning, deep learning, LLM reasoning
- **University of California, Davis** — Davis, CA
  Master of Science in Statistics — *Sep. 2019 - Jun. 2021*
- **Brigham Young University—Hawaii** — Laie, HI
  Bachelor of Science in Mathematics, Computer Science — *Sep. 2014 - Jun. 2018*

Work Experience

- **Amazon** — Bellevue, WA
  Data Scientist Intern - AMZL Delivery Station Planning — *May. 2026 - Aug. 2026*
  - **Time-series forecasting**: Led a project on forecasting shipment per route ratio 5 weeks ahead for 370+ delivery stations in North America by using Tabular Prior Fitted Networks. The prediction percentage error was reduced from 35% to 9% on average based on backtesting.
- **Genentech** — South San Francisco, CA
  AI intern for Causal ML — *May 2024 - Aug. 2024*
  - **Causal discovery on single-cell gene networks**: Led a project from start to finish on causal discovery and experimental design across multiple domains. Analyzed the in-silico single-cell gene regulatory network dataset called DREAM4 based on the developed causal discovery algorithm.
- **Bayer AG** — Whitestown, IN
  Data Scientist Intern — *Aug. 2022 - Dec. 2022*
  - **Causal Inference**: Evaluated the heterogeneous treatment effects of environmental factors and human practice to crop emergence from observational data using double machine learning and causal forests with dowhy and econml packages.
